Benshaw Start Here App

Rapid | Rugged | Global

Benshaw Start Here got an upgrade

The latest update to the Benshaw Start Here app brings a host of new functionalities, including the introduction of the Connect feature for Benshaw Medium Voltage starters fitted with the next generation 'NX' Controller. This new suite of connectivity options allows users to securely interact with compatible devices via Bluetooth Low Energy (BLE), offering enhanced control and monitoring capabilities.

Start Here continues to serve as your all-in-one solution, retaining the features you already know and love. Effortlessly store key contacts, access essential technical materials, receive instant model recommendations, and review comprehensive trip data—all within one app. With added improvements and a refreshed look, Start Here now offers an even more intuitive user experience.

(Android 12 or later)

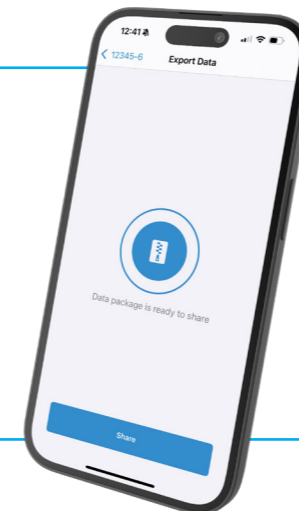

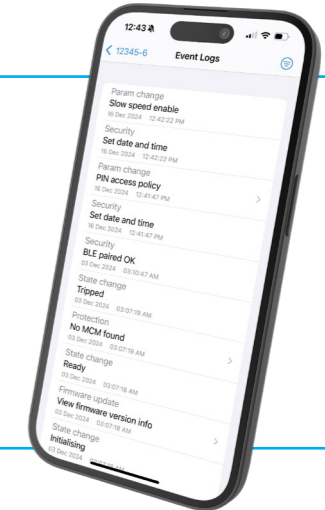

PARAMETER CONTROL

Easily adjust your starter's parameter values, offering a faster, more convenient alternative to the physical HMI. Backup, restore, or transfer parameter settings between starters with simple import/export functionality. Create custom text labels for specific parameters, like personalized trip names for configurable I/O.

EVENT LOGS

Access up to 5000 logged events with detailed data, using advanced filters to sort by event type. The Start Here app makes event log viewing and issue diagnosis simple. Export and share logs directly from your device using the Export Data feature.

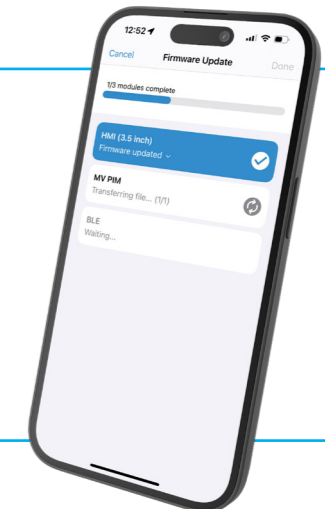

EXPORT DATA

Quickly export key data from your connected starter including; current parameter configurations, the latest 5000 logged events, lifetime operation data, and a summary of system hardware and software information—all in just one click. Easily share via your preferred file-sharing method for comprehensive technical support.

FIRMWARE UPDATES

Keep your soft starter up-to-date with secure firmware updates via the Start Here app. Perform updates using BLE to access the latest features and improvements, downloaded directly from the cloud with cyber-secure Bluetooth pairing and digitally signed firmware files.
