

**BENSHAW**  
Applied Motor Controls

# Applied motor controls for mission critical applications

*Welcome to Benshaw ...*

While many in industry have come to know Benshaw through our leadership position in low and medium voltage solid state motor control technologies, we also offer a comprehensive line of electro-mechanical motor controls and drives.

Today, Benshaw is widely recognized as the preferred source for a wide range of applied motor controls and motor protection products, and as a world leader in mission critical motor control solutions for heavy/severe duty industries and applications.

*When the application is critical ... and the environment harsh ... more customers specify Benshaw than any other brand.*

## Products At-a-Glance:

Benshaw offers an extensive range of rugged, reliable motor controls and drives — serving a broad spectrum of industries. And if a standard product doesn't fit your requirements, Benshaw's engineering team can help tailor a solution that does, no matter how complex or demanding the application.

### Low Voltage Controls

From basic, reliable low voltage soft starters to fully-featured, custom-engineered motor control systems, Benshaw has a product to suit your needs ... and our application engineers have the experience and expertise required to help you choose the ideal motor control solution for your industry and application:

- LV Soft Starters
- Low Voltage Drives
- Full Voltage Controls
- OEM Motor Controls
- Specialty Products

### Medium Voltage Controls

Benshaw designed and assembled the world's first full-production medium voltage solid state starter in 1988, and today has over 5,000 units installed worldwide. As a global leader in 2,300V to 15,000V solid state control, Benshaw has pioneered virtually every major innovation in medium voltage power electronics:

- MV Soft Starters
- Full Voltage Assemblies
- MV Switchgear Assemblies
- Line-Ups/Motor Control Centers
- MV Variable Frequency Drives
- MV IEC Motor Controls
- Specialty Products
- Projects
